

WARNING

Dangerous to the Environment

Hazard Classification: 6.9B, 9.1C

Safety Directions

Dicyclanil possibly may affect the blood and hematopoietic system. Handle with care.

Environmental Protection

Harmful to aquatic life. Avoid contamination of any water supply with product or empty container.

Emergency Response

In case of spillage, wear appropriate protective clothing and prevent material from entering waterways. Absorb spills with inert material and place in waste containers. Wash the area with water and absorb with further inert material. Dispose of waste safely.

Disposal

Preferably dispose of the product by use. Otherwise dispose of product and packaging at an approved landfill or other approved facility. Triple rinse empty container and dispose of rinsate away from waterways. Crush or puncture and bury in a suitable landfill. Do NOT use container for any other purpose.

*For further details see the Safety Data Sheet

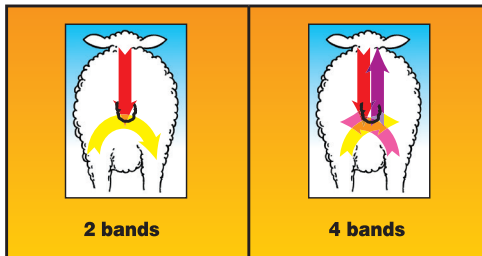

SHAKE WELL BEFORE USE

PLEASE READ LABEL COMPLETELY BEFORE USE

 Bodyweight (kg)	 Dose of volume (mL)	 Bands x volume in each (mL)
10-20	20	2 x 10
21-30	24	2 x 12
31-50	30	4 x 7.5
> 50	36	4 x 9

Application of CLiKziN for the protection of all areas likely to be struck.

NOTE: To achieve the best results it is very important that CLiKziN is applied onto all the areas to be protected. The dose volume applied should be based on the weight of the heaviest sheep in the mob.

Application and dose rate of CLiKziN at docking for the prevention of flystrike.

Apply 5 mL to ewe lambs (over the crutch) or up to 10 mL to ram lambs (i.e. 5 mL over the crutch and 5 mL over the scrotum if the lamb is being castrated), ensuring that sufficient product to cover the area to be protected is applied (see diagram).

It is an offence for users of this product to cause residues exceeding the relevant MRL in the New Zealand (Maximum Residue Limits of Agricultural Compounds) Food Standards.

WITHHOLDING PERIODS

- MEAT:** Sheep must not be sold for slaughter during or within 7 days of treatment.
- MILK:** Milk intended for sale for human consumption must be discarded for 35 days following treatment.

WOOL RESIDUES

Ensure the time between treatment and subsequent shearing is at least 2 months. For advice on your dipping programme contact your supplier.

ACTIVE INGREDIENT

CLiKziN contains 12.5 g/L of dicyclanil in the form of a suspoemulsion.

GENERAL INFORMATION

CLiKziN is a ready to use spray-on which will give medium-term residual protection (6 to 9 weeks for full body treatment and for treatment at docking) against flystrike caused by all the commonly found strike flies including the Australian blowfly (*Lucilia cuprina*). A shorter period of protection may occur if CLiKziN is applied incorrectly, if there is excessive fleece soiling or if wool infections such as mycotic dermatitis (fleece rot) are present. CLiKziN can be applied to damp sheep, however do not apply during heavy rainfall or when such conditions are expected before the product can dry on the fleece. Heavy rain following application of the product could diminish the period of protection.

By law the user must take due care, obtaining expert advice when necessary, to avoid unnecessary pain and distress when using the product other than as directed on the label.

DIRECTIONS FOR USE

Apply CLiKziN through a suitable clean applicator gun in bands (see diagrams) with the gun held 15-20 cm above the wool during application.

STORAGE

Store in original container, tightly closed, away from direct sunlight, in a cool, dry place, avoiding temperatures below 0°C and above 35°C.

CONDITIONS OF SALE

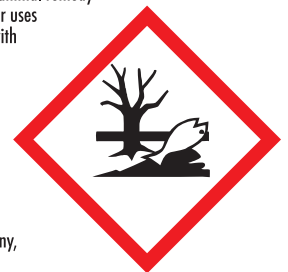

The manufacturer of this animal remedy extends/grants to the purchaser a warranty that this animal remedy is reasonably fit for the purposes for which its use is recommended, provided that the purchaser uses the remedy only for the purposes for which it is recommended and strictly in accordance with the directions on this container.
