

Outstanding insect control with reduced environmental impact

syngenta[®]

ACELEPRYN Turf Insecticide provides unmatched, season long grub and caterpillar control with a single application. The benefits are protection for your turf against key insect pests as well as peace of mind that you are looking after yourself, your staff and people enjoying the greenspace.

What ACELEPRYN offers you:

- Up to 6 months protection at the higher application rate
- Ease of use with no re-entry periods and no PPE requirements
- Controls a wide range of turf pests such as larvae of African Black Beetle, Argentine Stem Weevil larvae, Cutworm and Webworm with a single application

Performance summary - Australian trials

SpraySURE | Accuracy and Performance

To achieve great results, accurate application is important.

Target		Syngenta Nozzle	Optimal Water Rate	Optimal Pressure Range
Root and soil	So	XC 08	450 to 890 L/ha	2 to 4 bar
Leaf and crown	F	XC 04 or XC 025	> 400 L/ha	2 to 4 bar

African Black Beetle ACELEPRYN may be applied from spring onwards for preventative control of these species infesting turfgrass. The need for an application may be based on historical monitoring of the site, previous records or experiences, current season adult trapping or other methods.

Argentine Stem Weevil ACELEPRYN should be applied when over wintered adults are first observed in early spring (mid September) to prevent damage later. An application at this time will also give excellent control of African Black Beetle.

Caterpillars ACELEPRYN will provide excellent curative caterpillar control in turfgrass and should be applied when pests/damage is observed.

Target Pests	Rate	SpraySure
African Black Beetle, Argentine Stem Weevil larvae	0.75 to 1.5 L/ha	So
Caterpillars including Greasy Cutworm, Sod Webworm	750 mL/ha	F

Refer to the registered label for full details and instructions for use. **F** = Foliar applied **So** = Soil applied **Su** = Surfactant required

Active Ingredient

ACELEPRYN contains 200 g/L chlorantraniliprole, a member of the anthranilic diamide insecticides

GROUP **28** INSECTICIDE

Formulation and Packaging

1 L pack size (750 mL actual volume)

Suspension concentrate (SC) with minimal odour and excellent suspensibility in spray mixtures (excluding liquid calcium products).
