

DUALMAX

POUR-ON FOR CATTLE

Active Ingredients: 5g/L Abamectin and 100g/L Levamisole*.

SIMPLE MIXING TECHNOLOGY

Equal volumes of VETMED Abamectin Pour-On and VETMED Levamisole Pour-On mixed creates Dualmax Pour-On; A fast acting, combination Pour-On, to control resistant worm populations.

Products can either be purchased separately or as a treatment pack.

HIDE FRIENDLY FORMULATION - The novel carrier system used in Dualmax Pour-On, does not irritate the animal. Unlike some dual Abamectin/Levamisole Pour-Ons.

ADMINISTRATION

Apply along the back line of the animal, using a compatible drench gun, in a strip starting between the shoulder blades. After use, rinse the gun with warm soapy water.

RAIN

Rain will not effect the product if it falls two or more hours after treatment.

DOSE: 1mL per 10kg bodyweight (0.5mg Abamectin and 10mg Levamisole per kg bodyweight).

WEIGHT RANGE	DOSE VOLUME	WEIGHT RANGE	DOSE VOLUME
101 – 150 kg	15 mL	301 – 350 kg	35 mL
151 – 200 kg	20 mL	351 – 400 kg	40 mL
201 – 250 kg	25 mL	401 – 450 kg	45 mL
251 – 300 kg	30 mL	451 – 500 kg	50 mL

Cattle in excess of 500kg to be dosed at 1mL per 10kg bodyweight.

WITHHOLD PERIODS

MEAT: Cattle producing meat or offal for human consumption must not be sold for slaughter either during treatment or within 35 days of the last treatment.

MILK: Milk intended for sale for human consumption must be discarded during treatment and for not less than 35 days following the last treatment.

STORAGE

Store below 25°C.
