Organibor

Product information

Features of OrganibOR®

- ☀ New Zealand market proven for over 10 years
- ☀ Naturally occurring magnesium calcium borate
- ☀ Lowest sodium level found in boron fertilisers
- ☀ Safe on a wide range of crops
- ☀ Slow release boron rock designed to be applied annually at any time of the year
- ☀ Safe on soil microbes
- ☀ Can be easily mixed with other fertilisers, including lime
- ☀ BioGro certified

Application rates

Apples

50kg - 75kg per hectare

Avocados

50kg - 75kg per hectare

Grapes

25kg - 50kg per hectare

Vegetable crops

50kg - 75kg per hectare

Basic specification

Chemical formula: $\text{CaO MgO} \cdot 3\text{B}_2\text{O}_3 \cdot 6\text{H}_2\text{O}$

Appearance: Whitish chip

Boron content: 10% min

MgO: 4.6% - 6.2%

CaO: 13% - 16%

Particle size: 95% between 2 - 4mm

Packing: 25kg bags or 1000kg bulk bags

Organic certification: BioGro #2925

Always refer to leaf and soil sample results for application rates. For further information please discuss with your representative.
